

RE-CALL FOR ABSTRACTS

2nd international
Conference 2021 on

**Circularity in the
Built Environment**

24-26 November 2021
Delft, The Netherlands

2nd International Conference on Circularity in the Built Environment (CiBEn)

rescheduled to 24-26 November 2021 - Delft, NL

About the conference

The 2nd international conference on Circularity in the Built Environment (CiBEn) aims at becoming a major point of contact between researchers, engineers and practitioners in the area of green and sustainable construction. These topics call for a multi-disciplinary approach involving various research fields and expertise.

To this extent, CiBEn intends to provide all participating actors and stakeholders with the opportunity to exchange their ideas and showcases in advance/innovative technologies and methodologies to implement circularity in the European and worldwide construction sector.

The conference technical programme will feature both academic and practice-oriented presentations, in parallel tracks, in a variety of formats, as well as 4 keynote speakers and high-level panel discussions.

Eight main topics embracing all different aspects related to the theme of circularity in the built and environment, and sustainable construction materials will be dealt with. Among them, CDW Recycling Technologies, Sustainable Construction Materials, Circular Design & Management, Social Circular Economy, Standard Policy and Legislation, to mention a few.

CiBEn intends to provide researchers and industry experts with the opportunity to exchange their ideas and showcases in advanced/innovative technologies and methodologies to process and valorize primary and secondary construction materials in the context of circular economy and to facilitate the transition of the construction sector to fully circular economy model.

We are conscious of the heavy toll the Covid-19 crisis is having on humanity, and we hope that you and your loved ones are in good health. It is clear that this crisis is heavily impacting on our lives. Taking into account the recent advice provided by several organizations and by the advisory committee, we have decided to reschedule the Circularity in the Built Environment Conference from 22-24 September 2020 to 24-26 November 2021.

Call for Extended Abstracts IS OPEN NOW (reopened)

We invites expert members of the dredging community to contribute to the conference programme and submit abstracts for presentations in one of the following session categories.

Topics

We invite abstracts for papers on academic and applied research, and innovative solutions, relating to any aspect of Circularity in the Built Environment, listed on [our website](#).

Abstract submissions

The abstract body should be short (maximum 150 words), clear, concise, and written in English with correct spelling and good sentence structure. Figures and tables cannot be included and the abstracts should be in plain text submitted through a box in the online system (no need to upload). The abstract and extended abstract must be submitted simultaneously. All submissions must be original work, all submissions must be submitted electronically via the [online submission form](#).

Presentations

Presentations will be 20 minutes long, including 2 minutes for a brief discussion.

Important deadlines for authors:

- Submission of abstracts: June 20, 2021
- Notification of acceptance: 1 August 2021
- Submission of final papers: 16 August 2021

WHERE?

The 2nd international conference on Circularity in the Built Environment (CiBEn) will take place at the Aula of the Delft University of Technology, Delft NL.
